**[Real Estate Virtual Assistants Training Program, An Interview :: REAL ESTATE WEBOGRAPHER™ Certification](#)**

As a [real estate virtual assistant](#) ☺, I am constantly looking for ways to improve my knowledge base and connect with people who can understand that technology, in terms of real estate, is a must. As a growing VA company, I've been starting to formulate my ideas for a training plan for not only my team VA's, but to assist real estate professionals in finding the best resources for not only their training, but to their in-house assistants as well. As we all know, getting the training in technology for real estate is only have the battle. Executing the processes is the key. **I don't know about you, but I think technology knowledge and experience is what sets us apart from other administrative assistants for real estate pros.**

In all my research, I have only found one program, that allows INTERACTIVE training in the areas of real estate that are a vital part any business model. There are many certifications for real estate assistants, there are vendor training programs, but none are interactive in the way the WEBOGRAPHER program is, so I'm strongly considering it as an extension of my own training program.

I had the opportunity to interview Marc Grayson, president & founder of the REAL ESTATE WEBOGRAPHER™ Certification located at [www.Webographers.com](http://www.Webographers.com) ☺. This RE technology certification is available to Virtual Assistants who look to maintain an all-inclusive web presence for agents and brokers. And.... He was kind enough to extend a discount to our REVA Group;) Consider this program for your own use, as a recommendation to your clients, and to train your team of VAs as your business grows. RE Webographer Certification has the ability to take what you learn, and actually let you use it first~
